SUNDAY - JANUARY 3

9 Began reading "Tom Jones"

2 disciples, is, when once upon
3 are got up, to kick the stool
4 from under you. In Plain
5 English, when you have
made your fortune by the
good offices of a friend, you
are advised to discard him
as soon as you can."

1 The operation of the digital

4 the operation since
5 March. The high income
of the past three years
seems to have ended

TUESDAY - SEPTEMBER 27

and I suspect
we have been
thrown off balance by
the exceptional income
and our ability to meet
higher wage and salary
demands. With the termination
of the "Medicare" program
the patient day level has
returned to a more normal
basis and I am afraid
left us high on the

WEDNESDAY - SEPTEMBER 28

beach with low income
and high level of
expense. Other factors
have entered in here too.
During the past three
years newer procedures
such as "open heart
surgery" and "neurological
procedures" have been
done in the hospital.
In a word, a great deal

Any boiler is a potential high explosive. Why not insure it?

of difficult work for which we are not fitted with physical layout or trained personnel. Coupled with lower than "normal censes" we have managed to rack up a loss of 70'000.00 in ten months.

The "Board" is naturally disappointed and I am sure that had this situation developed before

we owned not have begun the building program. Generally, they are a group of men who do not understand the hospital or its problems. I was tempted to say, men of little faith but perhaps that is too harsh. After all we are in

SATURDAY - OCTOBER 1

This is our cause. Nevertheless, there were never any positive approach to the fund raising and the "leaders" continually expressed surprise rather than delight at the successes. In fact, much satisfaction was expressed when the drive ended a million dollars short of the goal.

SUNDAY - OCTOBER 2

When the bids for the new building were opened Mr. McDonald approached Babbit and myself to discuss an alternate way to take care of the hospital expansion needs.

1. We had on hand in pledges some $2,500,000.00 and a grant

from the government of $916,000.00

② The bids were $2,815,000.00 and equipment and fees brought amount to another $300,000.00

③ We would be short approximately 500,000 to 750,000.00

His first proposal

TUESDAY - OCTOBER 4

was that we forget the whole thing. Forgo the government grant and return to those who donated their gifts. Some would still make their gifts and with what was left we could remodel or renovate sufficiently to keep going.

Three arguments were presented in opposition —

① The loss of the $176,000.00 and with it the diversion and trust of the State Health department

② Some of the pledge money was already spent on architects fees, etc.

③ It would be impossible to meet State regulations in the ~~new~~ old building - without becoming a Small second rate Hospital.

THURSDAY - OCTOBER 6

at a subsequent Board Meeting it was decided to go ahead, the contract was approved and a commitment for borrowing to fill in the gap.

a Fund raising committee was appointed to start work immediately

FRIDAY - OCTOBER 7

Early in the year I asked Harold Baird, the president to appoint several committees to work with me and suggested that every man on the Board be put on some committee. In view of the problem which those developed this year, it seems

SATURDAY - OCTOBER 8

this more an elected thing to do. I have had an opportunity to become better acquainted with the men on the Board. The school of nursing committee became very active under the direction of Rae Shaub, approving

About this time John Bonica came to the house asking to be allowed to accept the head professorship at the University of Washington and continue his

directorship of the department of Anesthesia at the hospital. The executive committee approved with pride in such a relationship. When the minutes of the meeting were read at free Board meeting this item was questioned by Mr. Wagner who had not heard of

this before. A question was directed at Doctor Hadfield, president of the medical staff and also a member of Dr Bonica's group. To my surprise he indicated disapproval over the move and stated that it was not certain if the members of the group would go

along with Dr. Bonica's plan. Also he said that John Bonica had taken a great deal for granted in assuming the cooperation of the group. Prior to this meeting John had discussed the whole plan with me and told me that he had talked

FRIDAY - OCTOBER 14

9 Hadfield was not
content with his attack

I called together the heads of the specialties for consultation and this has resulted in a determination to hold a meeting of Anesthesiology, Laboratory X ray, Surgery and Nursing quarterly to better communicate problems.

SUNDAY - OCTOBER 16

The Board requested a run down on the anesthesiology department and I am preparing a historical paper for them. In the meantime Bonica and Hadfield had it out and Hadfield resigned from the Grassy practice

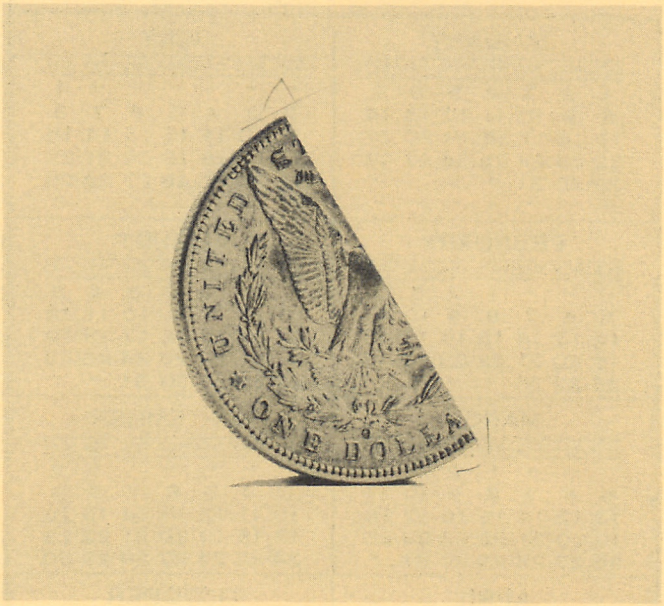
PRINTED IN U. S. A.

"Unforeseen events . . . need not change and shape the course of man's affairs"



That's only the half of it

Inflation has taken a big bite out of the dollar. Replacement costs are up . . . and so is your need for adequate insurance.

For Dwellings alone, values are up about 70% in the last eight years. Are *you* safe? Better make sure. With the help of your Maryland agent or broker, find out the actual replacement value of your home and all your furnishings and personal possessions at *today's* prices. Then bring your protection up to date. Remember: *because your Maryland agent knows his business, it's good business for you to know him.*
